

Name: Key
 Surface Area and Volume Test Review

1. Surface Area = 672 cm²

$$SA = 2A + 2B$$

$$3\Box + 2\Delta$$

$$20 \cdot 10 + 12 \cdot 10 + 16 \cdot 10 + 2\left(\frac{1}{2} 12 \cdot 10\right)$$

2. Surface Area: _____

$$4\Delta + 1\Box$$

$$4\left(\frac{1}{2}(16)(17)\right) + 16^2$$

$$800 \text{ in}^2$$

3. David wants to wrap the columns outside a ^{White House} building in paper for a party. The columns are 10 feet tall and have a circumference of 40 inches. How much wrapping paper does he need?

$$LA = 2\pi r h$$

$$2\pi(6.367)(10)$$

$$LA = 400.05$$

$$C = 2\pi r$$

$$\frac{40}{2} = \frac{2\pi r}{2}$$

$$\frac{20}{\pi} = \frac{\pi r}{\pi}$$

$$r = 6.367$$

4. Find the Volume of the Prism in Number 1: 960 cm³

$$\frac{1}{2}(16)(12)10 =$$

5. Find the volume of the pyramid in Number 2: 1280 in³

$$\frac{1}{3}(16)^2 15$$

6. Find the Surface Area:

$$340.2 \text{ cm}^2$$

$$12^2 + 5.7^2 = c^2$$

$$176.49 = c^2$$

$$c = 13.3$$

$$SA = LA + B$$

$$\pi r l + \pi r^2$$

$$\pi(5.7)(13.3) + \pi(5.7)^2$$

7. Find the Volume:

$$V = Bh$$

$$V = \left(\frac{1}{2} \cdot 6 \cdot 8\right) 12 = \boxed{288 \text{ units}^3}$$

$$5.7 \text{ yd} \quad 13.3 \text{ yd} \quad .056$$

$$\div 3 \quad \div 3 \quad \div 36$$

8. A concrete driveway is being poured 17 feet by 40 feet by 2 inches. How much concrete is needed? How much will the drive way cost if concrete is 24 dollars per cubic yard?

$$5.7 \times 13.3 \times 0.056 = 4.24 \text{ yd}^3$$

$$\times 24$$

$$\boxed{\$101.76}$$

9. Find the Volume:

$$\frac{1}{3}(32^2)(30)$$

$$10240 \text{ in}^3$$

10. Surface Area: 615.75 units²

Volume: 1436.76 units³

$$SA = 4\pi r^2$$

$$4\pi 49$$

$$Vol = \frac{4}{3}\pi r^3$$

$$\frac{4}{3}\pi 7^3$$

11. Similar? If so what is the similarity ratio?

$$\frac{16}{5} = \frac{21}{7} = \frac{3}{1}$$

$$\frac{16}{5} = 3 = 3$$

Not Similar

12. Find the volume of Solid #2

Solid #1
SA = 1100 yd²
V = 19000 yd³

Solid #2
SA = 176 yd²
V = ?

$$\frac{176 \text{ yd}^2}{1100 \text{ yd}^2} = \frac{X \text{ yd}^3}{19000 \text{ yd}^3}$$

$$\sqrt{4}$$

$$\sqrt{25}$$

$$\left(\frac{2}{5}\right)^3$$

$$\frac{152000}{125} = \frac{125X}{125}$$

$$X = 1216 \text{ yd}^3$$

$$\frac{8}{125} = \frac{X}{19000}$$
